

It's Easily the Most Reliable, Affordable Neck Bander Ever

DEITZ
COMPANY INC.
DATA SHEET

A Pharmafill NB1 neck bander applies tamper-evident bands to bottles and directs them to the companion heat tunnel for sealing.

The Pharmafill NB1 automatically applies tamper-evident bands and sleeve labels onto bottles, jars, vials, tins and other containers with unprecedented accuracy, reliability, and affordability. It's easy for any line operator to setup and operate, and hundreds of growing companies have found it's the easiest way to keep up with sales by upgrading from a manual to automated process.

Versatile, Adjustable

- Lay flat 25 mm – 123 mm in width
- Band length 0.79 inches – 10 inches
- Speeds up to 100 per minute based on band size
- Fits caps 14 mm – 76 mm in diameter
- For all heat-shrinkable banding materials
- Stainless steel and acetal with anodized aluminum in contact areas for FDA, GMP compliance

“Smooth sailing since we purchased our NB1 neck bander – our technician installed it without any problems, and the service and attention from Deitz Company are appreciated.”

- Sharon Erbaugh, Vice President Operations, Basic Vitamins

User-friendly design sets the film drive mechanism at the front of the machine. A clear, plastic safety door allows constant visual monitoring and automatically stops operation when opened.

Unwind reel set in vertical position saves space, promotes smooth film feeding.

The latest, touch-screen HMI makes it easy for entry level line workers to manage the process from a single, colorful screen with very little training.

Built-in bottle spacing wheel provides precise control over the bottle speed and spacing for smooth entry and exit.

Adjustable lift stand raises and lowers the banding mechanism to match bottle height and fit over nearly any conveyor.
